

OVERVIEW

FoodieRoute

Helping Tourists Explore Restaurants
with **Confidence**

PROJECT OVERVIEW

Tourists often face uncertainty when choosing restaurants in unfamiliar cities. FoodieRoute combines official food safety information with community reviews to support more confident dining decisions.

KEY FEATURES

Official Food Safety Rating

See government food safety ratings.

DIY Food Journey

Build and modify personalised dining routes.

Route-Based Discovery

Find better options along the way.

Interactive Map

Compare places visually on the map.

PROBLEM SPACE & TYPICAL USERS

The Challenge: Fragmented information—official safety data vs. user reviews—makes it difficult for Brisbane tourists to make confident, informed decisions about where to eat, especially when time is limited.

TARGET USER PROFILE

TOURISTS

TIME-CONSTRAINED

SAFETY-CONSCIOUS

TASTE-DRIVEN

The Efficient Traveler

“As a traveler with a planned itinerary, I want to find restaurants along my route, so that I can eat without taking unnecessary detours.”

The Health-Conscious Diner

“As a person who cares about health, I want to see official ratings and inspection dates to confidently avoid high-risk places.”

Survey Findings

13 Question

Q1. Which information first attracts your attention and influences your initial judgement?

23 responses

Q2. If a restaurant has very high user ratings but a low official food safety score (e.g., 2 out of 5), what would you do?

23 responses

High-Fi Prototype

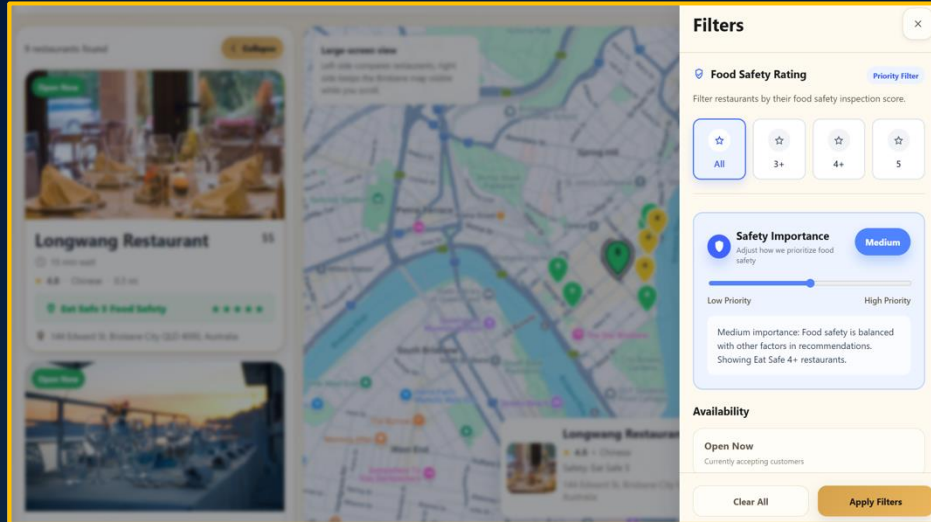

Figure 1: Filters Page

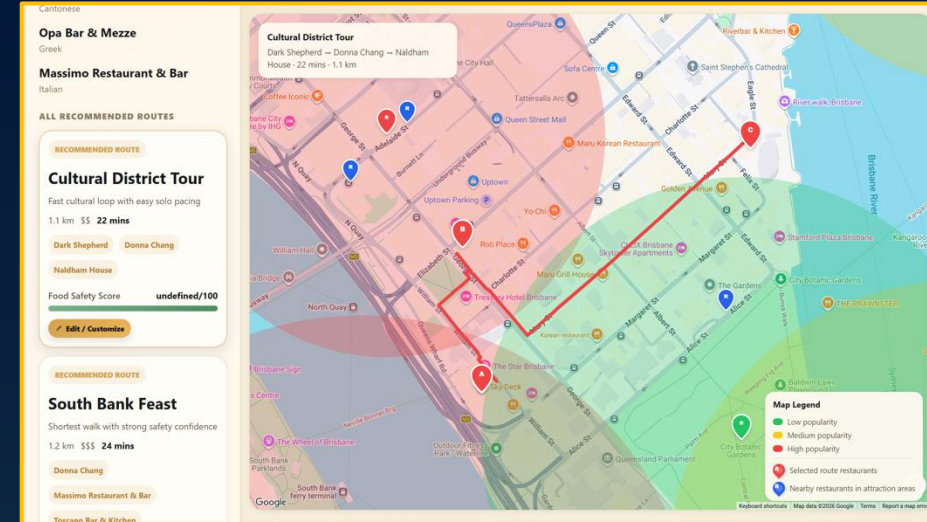

Figure 2: Route Choosing Page

Prototype's Goal

Create a realistic and interactive map for confident restaurant decisions.

MVP Features

- ✓ Food safety ratings with reviews
- ✓ Recommended Routes
- ✓ DIY and edit routes
- ✓ Interactive filters and customization

Design Rationale

- Reduce fragmented information
- Make key information visible
- Support trust during decision-making
- Balance guidance with user control

FoodieRoute vs Google Maps

Why FoodieRoute Is More Than Just a Restaurant Navigation Tool ?

Trust Beyond Ratings

Official safety data beyond ratings

Explore While Travelling

Find restaurants along your journey

Designed for Tourist Confidence

Reduce uncertainty when dining

KEY VALUE PROPOSITION

FoodieRoute transforms restaurant discovery from simply finding places to helping tourists confidently choose where to eat.

FUTURE DEVELOPMENT

Elderly & Mobility Support

Add walking, transit, and driving modes to give seniors more flexible travel times.

Inclusive UX Research

Conduct dedicated user testing with senior travelers to analyze their travel habits and app needs.

Supporting Local Impact

Add a “Hidden Gems” tag to help users find safe, local small businesses.
